PROJECTS

● Gallery Café WebApp

The complete web application for online food ordering system using html , css , js and php .
HTML , CSS , JS , PHP

<https://github.com/Shana2002/galleryCafe>

● Coin Master

Coin Master is a Flutter-based platform that provides real-time details about cryptocurrencies, integrated with the CoinGecko API for accurate and up-to-date market information.
Flutter

<https://github.com/Shana2002/coin-master>

● Gym Scheduler

Gym Schedule App for Android and ios. Developing in Flutter using local storage hive.
Flutter

<https://github.com/Shana2002/gym-sheduler>

● Inventory Management System

This Inventory Management and Billing System is a comprehensive application built using Python GUI, specifically designed for Thushara Photo Framing. It streamlines inventory management and facilitates billing processes, providing robust features for managing customer relationships, stock, and financial transactions.
Python

<https://github.com/Shana2002/IMS>

● Encrypt-decrypter

A Python application designed for secure message encryption and decryption, providing users with a reliable method to protect sensitive information using custom algorithms.
Python

<https://github.com/Shana2002/encrypt-decrypter>

● Employee-management system

The Employee Management System for the Colombo Institute of Studies replaces manual processes with a streamlined, digital solution. HR Managers can add departments, designations, and employees, and conduct detailed searches. Admins create HR accounts. This system improves efficiency and data accuracy.
Java

<https://github.com/Shana2002/encrypt-decrypter>

● Buns talk billing System

The Buns Talk Billing System is a C++ command-line app for efficient billing. It enables users to add/ manage customer orders, calculate totals with tax and discounts, generate receipts, and track sales history for financial insights. Ideal for small businesses, Buns Talk streamlines the billing process, improving accuracy and saving time.
C++
